

Contitech VINTNER RESERVE

-29.2°F TO +219°F

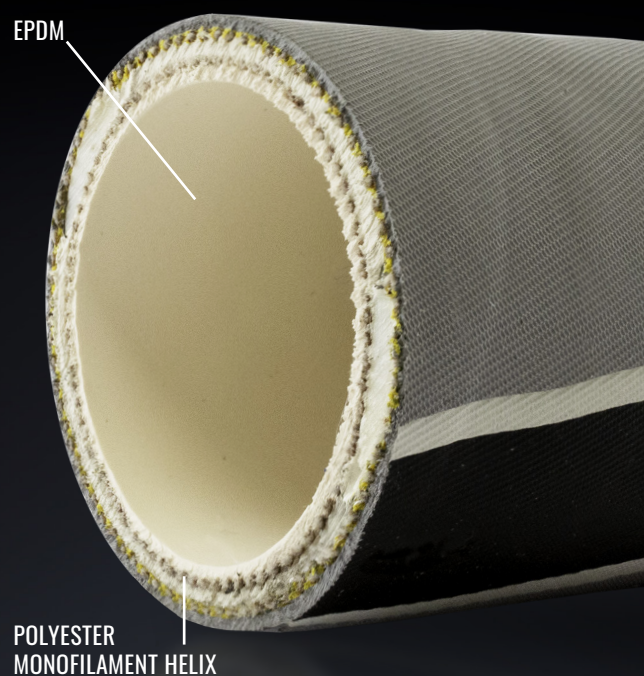

EPDM

POLYESTER
MONOFILAMENT HELIX

Contitech Vintner Reserve was the first crushproof hose in the winery & brewery industry. As the originator, it has proven to be the most reliable and popular brand. The polyester monofilament helix provides a lightweight, 'crush resistant' alternative to traditional softwall or steel wire reinforcement. The EPDM lining is designed to withstand a variety of chemicals and substances.

Contitech VINTNER LITE

-29.2°F TO +219°F

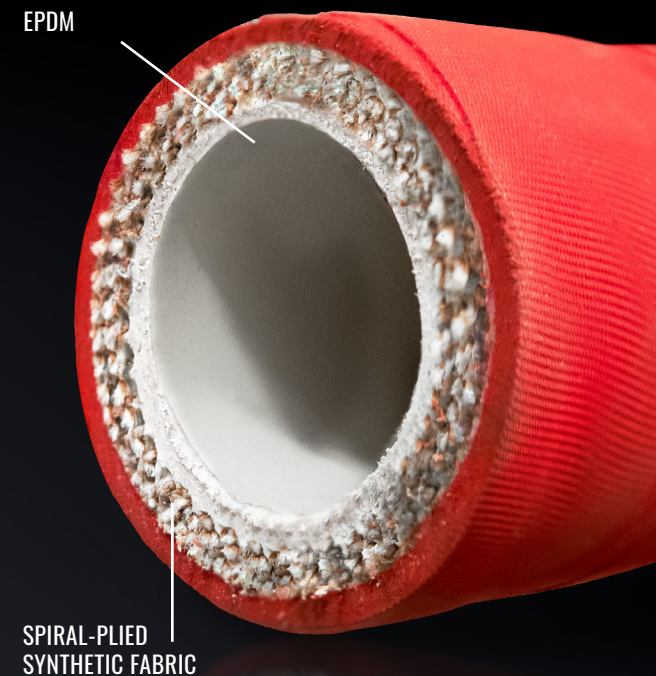

EPDM

POLYESTER
MONOFILAMENT HELIX

Vintner Lite is the lightweight redesign of the popular Vintner Reserve hose. It maintains the durability and heat resistance of its predecessor, while being easy to maneuver. It can handle up to 150 psi and weighs approximately 0.2lbs less per foot than the Vintner Reserve. The EPDM lining provides a broad range of chemical resistance making it a versatile option.

Contitech BREWLING

-40°F TO +221°F

EPDM

SPIRAL PLIED
SYNTHETIC FABRIC

Brewling by Contitech is the replacement for the popular Goodyear BREWLING and is designed with breweries in mind. It is lighter in weight and more flexible than the old style Brewling but loses none of its toughness. It is built to withstand the wear and tear of brewery life. This hose has also been branded as "Drinkline" by Contitech.

Contitech VERSACHEM

-40°F TO +212°F

NON-POROUS UHMWPE

STEEL HELIX & SPIRAL
PLIED SYNTHETICS

The Versachem (Distillers) Hose by Contitech is designed for the transfer of chemicals, high proof ethanol, high viscosity substances, and powdery materials. The UHMWPE lining is chemical and abrasion-resistant, easy to clean, and static dissipating. It is reinforced with dual steel helix wires and spiral-plied synthetic fabric. The Versachem is perfect for distilling and herbal extractions.
